PROFESSIONAL SUMMARY

Software Engineer & IT Specialist with 2+ years of hands-on experience bridging full-stack software development with core IT infrastructure management. Proficient in engineering scalable web applications, designing secure database architectures, and delivering end-to-end technical support across enterprise environments. Expertise across the modern development stack (React, Next.js, Node.js, and SQL), combined with a strong foundation in system administration, network troubleshooting, and security compliance. Adept at diagnosing complex technical bottlenecks, automating workflows, and delivering high-availability software solutions that align technical capabilities with broader business objectives.

CORE COMPETENCIES

ICT Technical Support • Network Troubleshooting • Systems & Database Administration • Full-Stack Software Engineering • RESTful APIs • Information Security & Access Control • Workflow Automation

PROFESSIONAL EXPERIENCE

ICT Operations & Support Specialist — CMT Realtors Limited *February 2024 – Present*
Nairobi, Kenya

- Resolve tier-1/tier-2 hardware, software, and network issues for internal staff, sustaining a high first-contact resolution rate and minimizing operational downtime.
- Spearheaded site assessments, reporting, and technical documentation for 40+ telecommunications infrastructure acquisitions.
- Administer operational databases, execute routine system backups, and author internal IT workflow documentation to strengthen system reliability.
- Manage end-to-end workstation provisioning, software deployment, and peripheral configuration across departmental business units.

Freelance Software Engineer & ICT Consultant — Self-Employed *July 2024 – Present*
Kenya / Remote

- Architect and deploy responsive, high-performance full-stack web applications using Next.js, React, Node.js, TypeScript, and PostgreSQL.
- Design, optimize, and maintain relational schemas and data models with PostgreSQL, MySQL, and Prisma ORM.
- Implement security controls including JWT/OAuth authentication, Role-Based Access Control (RBAC), and strict server-side data validation.
- Debug and optimize code, integrate REST APIs, and produce comprehensive technical documentation for client platforms.

ICT & Administrative Attaché — National Health Insurance Fund (NHIF) *August 2023 – October 2023*
Nanyuki, Kenya

- Delivered technical support for digital member registration platforms, biometric enrollment hardware, and branch network peripherals.
- Captured, verified, and managed confidential client records within institutional information systems while maintaining 100% data compliance.
- Executed proactive network troubleshooting and hardware maintenance to ensure zero service disruption during peak operational hours.

SELECTED PROJECTS

ITSM Helpdesk — IT Service Management System | *Next.js | TypeScript | PostgreSQL | Prisma ORM*

- Engineered a full-stack ticketing platform supporting dynamic incident reporting, priority assignment, and real-time status tracking.
- Integrated granular Role-Based Access Control (RBAC) and system audit logging for enhanced administrative oversight.

Huduma360 — Digital Services Platform | *Next.js | TypeScript | PostgreSQL | REST APIs*

- Developed a centralized platform for managing public/digital service requests and user profile management.
- Built secure REST API endpoints and responsive user interface components for seamless user navigation.

Network Design & WAN Connectivity Simulation | *Cisco Routers | TCP/IP | VPN Configuration | LAN/WAN*

- Designed, simulated, and configured a secure multi-site WAN architecture connecting 3 remote branch offices to a central headquarters.

TECHNICAL SKILLS

- **Languages & Web:** TypeScript, JavaScript, Python, HTML5, CSS3, SQL
- **Frameworks & Libraries:** React, Next.js, Node.js, Express.js, Prisma ORM
- **Databases & Cloud:** PostgreSQL, MySQL, MongoDB, Firebase, Microsoft Azure, Docker, Vercel
- **Networking & Support:** TCP/IP, LAN/WAN, VPN, DNS/DHCP, Windows/Linux Administration, Hardware Diagnostics
- **Developer Tools:** Git, GitHub, VS Code, Postman, Cisco Packet Tracer

EDUCATION & CERTIFICATIONS

Diploma in Information Technology — Dedan Kimathi University of Technology, Nyeri, Kenya *2022 – 2023*
Relevant coursework: Computer Support & Maintenance, Network Design, Database Programming, Software Engineering, Systems Analysis, Web Development

Self-Directed Software Engineering & ICT Technical Learning
Independent Study & Online Technical Training *2023 – Present*

- Continuously Advancing ICT and Software Engineering expertise through self-directed learning, technical documentation, and hands-on projects.
- Developed practical skills in ICT support, network troubleshooting, system administration, database management, full-stack development, API integration, and cloud deployment.

Kenya Certificate of Secondary Education (KCSE) — Nyeri High School, Nyeri, Kenya (Mean Grade: B-) *2010 – 2013*

Certifications

- Microsoft Azure Fundamentals (AZ-900)
- Docker Foundations
- Meta Front-End Developer Professional Certificate
- Meta Back-End Developer Professional Certificate
- FreeCodeCamp: Full-Stack Web Development, Responsive Web Design, JavaScript, Relational Databases, Python, Back-End Development & APIs
